DESIGNED BY DANIEL KORB

| B Ä N D A

Bända is pure and simple modern lounge furniture that delivers configurability for sensible and adaptable social, public spaces.

Its lightly scaled, open steel frame creates more accessible fluid spaces, effortlessly replacing bulky furniture. Power and data, lighting and universal components create harmonious backdrops for personal work or collaborative sit-downs.

Multiple components and smart accessories, such as lighting and electrical/data options, let work take place anywhere, any time.

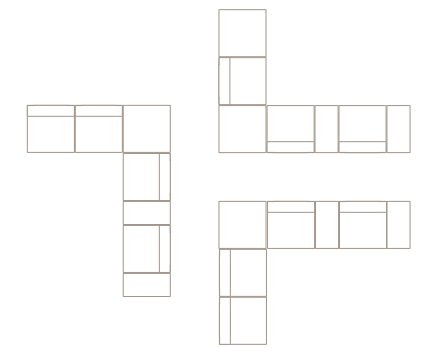

Bända's familiar forms and generous seating and table surfaces are scaled for social connectivity and impromptu group dynamics. It's furniture designed to blend and engage, not dominate and intrude. Bända's flexibility to tuck into corners for privacy or embrace a 360° open plan with limitless connectivity offers wide application.

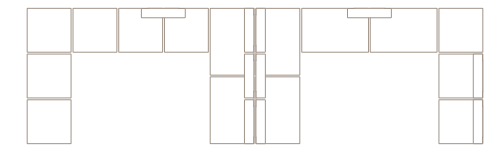

Bända's scalable frames and smart components provide unlimited options to divide space and create seating and table configurations. Bända's frame works like a chassis: seat cushion, backrest, and armrest elements attach easily, and are universally-sized for mixing and matching.
